# PROJECT: ATG CALIFIT – OFFICIAL WEBSITE

Act as a senior UI/UX designer, creative director and full-stack web developer. Build a premium, modern, responsive and production-ready website for **ATG CaliFit**, a Calisthenics & Performance Training Centre based in Pune, Maharashtra, India.

Website: https://atgcalifit.in/

Instagram: https://www.instagram.com/atg.cali.fit/

## 1. BRAND INFORMATION

**Brand Name:** ATG CaliFit

**Tagline:** STRENGTH • SKILLS • COMMUNITY

**Business Category:** Calisthenics & Performance Training

**Location:**
Near 7th Heaven Society, Next to Prakash Tingre Sports Ground, Pune, Maharashtra 411015, India.

**Brand Philosophy:**
ATG CaliFit is focused on developing strength, body control, mobility, endurance and advanced physical skills through calisthenics and bodyweight training.

The philosophy is simple: Your body is your equipment.

The website should communicate that calisthenics is not just about building muscles. It is about mastering your own body, developing functional strength, learning new skills and becoming physically stronger.

## 2. BRANDING AND DESIGN DIRECTION

Use the supplied ATG logo as the primary brand identity.

Design direction:

- Premium athletic and street-workout aesthetic.
- Dark background, predominantly black (#0B0B0B).

- Off-white typography (#F4F2EC).
- Bright yellow accent (#FFD323).
- Use subtle grey for secondary text.
- Strong, bold typography.
- Large editorial headings.
- Minimal but powerful layouts.
- High-quality workout photography.
- Smooth scroll animations and micro-interactions.
- Modern asymmetrical layouts.
- Large image sections with cinematic presentation.

The website should look like an international calisthenics training brand.

Avoid:

- Traditional bodybuilding gym website designs.
- Generic fitness templates.
- Excessive gradients.
- Too many rounded cards.
- Cartoon-style fitness graphics.
- Stock images of people lifting dumbbells.
- Overuse of animations.

Use a combination of bold sans-serif typography for body text and distinctive editorial typography for major headings.

# 3. HERO SECTION – FIRST SCREEN

Create a visually powerful, full-screen hero section.

Use the supplied vertical workout video as the hero background or as a large cinematic media element.

Video requirements:

- Autoplay.
- Muted.
- Loop.
- Plays inline on mobile.
- Use an appropriate poster image.
- Add a dark overlay for text readability.
- Optimize video loading and mobile performance.

Hero content:

Small heading:
ATG CALIFIT | PUNE

Main heading:

"YOUR BODY.
YOUR STRENGTH.
YOUR LIMITS."

Supporting text:

"Build real strength. Master bodyweight skills. Discover what your body is capable of."

Brand tagline:

STRENGTH • SKILLS • COMMUNITY

Primary CTA: START YOUR JOURNEY

Secondary CTA: EXPLORE TRAINING

Include a subtle scroll-down indicator.

Make the hero visually impressive, with the athlete and calisthenics movements being the main focus.

# 4. ABOUT ATG CALIFIT

Section heading:

"MORE THAN JUST TRAINING."

Description:

"ATG CaliFit is a space for individuals who want to build strength beyond conventional workouts. Through calisthenics and performance training, we focus on bodyweight strength, movement control, mobility and skill development.

Whether you are starting with your first push-up or working towards advanced skills like the human flag, every journey starts with consistency, discipline and the right progression.

Train your body. Challenge your limits. Become stronger."

Highlight three brand pillars:

01 – STRENGTH
Build functional strength using your own body weight.

02 – SKILLS
Learn and progress towards advanced calisthenics movements.

03 – COMMUNITY
Train together, motivate each other and grow stronger together.

# 5. TRAINING PROGRAMS

Create a visually engaging training section with large photographs and interactive hover effects.

Heading:

"TRAIN YOUR BODY. MASTER THE MOVEMENT."

Include these training categories:

## A. BODYWEIGHT STRENGTH

- Push-ups
- Pull-ups
- Chin-ups
- Dips
- Squats
- Core strength
- Dead hangs

## B. CALISTHENICS SKILLS

- Human Flag
- Muscle-up
- Front Lever
- Back Lever
- Planche
- Handstand
- L-sit

## C. GYMNASTIC MOVEMENTS

- Skin the Cat
- Ring Training
- Static Holds
- Controlled Bodyweight Movements

## D. PERFORMANCE & CONDITIONING

- Functional strength
- Mobility training
- Flexibility
- Core stability
- Endurance
- Movement control

Use high-quality photographs or supplied training videos for each category.

Each category should have a short description and an appropriate CTA.

Do not claim that every program is available as a separate batch unless confirmed by the business.

# 6. CALISTHENICS SKILL SHOWCASE

Create a dedicated section showcasing advanced calisthenics movements.

Heading:

"IMPOSSIBLE IS JUST A SKILL YOU HAVEN'T MASTERED YET."

Show large image tiles for:

- Human Flag
- Muscle-up
- Front Lever
- Planche
- Handstand
- Skin the Cat

Use a premium image gallery layout.

On hover, display the skill name and a short description.

Clicking an image should open a larger image or video presentation.

This section should visually demonstrate what students can work towards at ATG CaliFit.

# 7. THE ATG CHALLENGE

Take inspiration from the supplied black-and-yellow challenge poster.

Create a high-impact challenge section.

Heading:

"CAN YOU DO THIS?"

Challenge list:

- 5 Pull-ups
- 20 Push-ups
- 1 Min Dead Hang
- 30 Squats
- 1 Min Plank

Use yellow horizontal markers and bold typography.

Design this section like a fitness challenge poster integrated into the website.

Add CTA:

"READY TO TAKE THE CHALLENGE?"

The challenge should be editable from the website content configuration.

# 8. WHY CHOOSE CALISTHENICS?

Heading:

"YOUR BODY IS YOUR BEST EQUIPMENT."

Show four benefits:

- Functional Strength – Develop strength that supports real-world movement.
- Body Control – Improve coordination, stability and movement awareness.
- Mobility & Flexibility – Develop better movement quality and control.
- Skill Development – Progress from foundational exercises towards advanced skills.

Use clean typography, large numbers and subtle motion effects.

# 9. TRAINING EXPERIENCE / GALLERY

Create an immersive gallery showcasing the real ATG CaliFit training environment.

Use the supplied video and other available brand media.

Include:

- Training sessions.

- Pull-up and push-up practice.
- Outdoor training environment.
- Advanced calisthenics skills.
- Athlete progress.
- Group training and community.

Create a modern masonry or asymmetrical gallery.

Allow users to view images and videos in a lightbox.

Add a CTA:

"BE PART OF THE MOVEMENT."

Link it to the enquiry section.

Use actual brand media wherever possible. Do not invent photographs of ATG members or facilities.

# 10. COMMUNITY SECTION

Heading:

"STRONGER TOGETHER."

Description:

"Calisthenics is not just an individual journey. It is about learning, pushing limits, supporting one another and celebrating every milestone."

Use authentic community and training photographs.

Add Instagram integration or a social media gallery.

Instagram:
https://www.instagram.com/atg.cali.fit/

Include a follow button linking to Instagram.

Do not display fabricated Instagram posts, followers or engagement numbers.

# 11. LOCATION AND CONTACT

Heading:

"YOUR NEXT REP STARTS HERE."

Display the complete address:

Near 7th Heaven Society,
Next to Prakash Tingre Sports Ground,
Pune, Maharashtra 411015, India.

Include:

- Google Maps embed using the address.
- Get Directions button.
- Instagram contact link.
- Enquiry form.
- WhatsApp enquiry button.

Enquiry form fields:

- Full Name
- Mobile Number
- Email Address
- Fitness Experience (Beginner / Intermediate / Advanced)
- What do you want to achieve?
- Message

Submit button:
"START MY JOURNEY"

Use proper validation and spam protection.

Do not invent a phone number, WhatsApp number, email address or Google Maps coordinates. Keep these configurable in one central site configuration file.

# 12. FOOTER

Include:

ATG CALIFIT

STRENGTH • SKILLS • COMMUNITY

Calisthenics & Performance Training

Quick links:

- Home
- About
- Training

- Skills
- Gallery
- Contact

Social media:
Instagram – https://www.instagram.com/atg.cali.fit/

Location:
Pune, Maharashtra, India.

Copyright:
© 2026 ATG CaliFit. All Rights Reserved.

# 13. WEBSITE NAVIGATION

Create a clean sticky navigation bar.

Logo on the left.

Navigation:

- Home
- About
- Training
- Skills
- Gallery
- Contact

Right-side CTA:
JOIN ATG

On mobile, create an elegant hamburger navigation with a full-screen or slide-out menu.

The navbar should transition from transparent over the hero to a solid dark background when scrolling.

# 14. TECHNICAL REQUIREMENTS

Build the website using:

- Next.js (App Router)
- React
- TypeScript
- Tailwind CSS
- Lucide React icons

- Framer Motion for animations where appropriate

Requirements:

1. Fully responsive for desktop, tablet and mobile.
2. Mobile-first design.
3. Clean reusable components.
4. Proper semantic HTML.
5. SEO-friendly page structure.
6. Optimized images using Next.js Image.
7. Optimized video loading.
8. Lazy loading below-the-fold media.
9. Smooth scrolling.
10. Accessible navigation and buttons.
11. Proper form validation.
12. Production-ready code.
13. No unnecessary dependencies.
14. No horizontal overflow on mobile.
15. Good Lighthouse performance.

# 15. SEO CONFIGURATION

Website title:

ATG CaliFit | Calisthenics & Performance Training in Pune

Meta description:

Build strength, master bodyweight skills and improve your performance with ATG CaliFit. Discover calisthenics and bodyweight training in Pune.

Target keywords:

- Calisthenics in Pune
- Calisthenics training Pune
- Bodyweight training Pune
- Strength training Pune
- Human flag training
- Pull-up training Pune
- Calisthenics classes near me
- Performance training Pune

Implement:

- Open Graph metadata.

- Social sharing image.
- Sitemap.xml.
- Robots.txt.
- LocalBusiness structured data with only verified business information.
- Descriptive image alt text.
- Canonical URL.

# 16. ASSET MANAGEMENT

Use the supplied files:

1. ATG logo – use as the website logo and favicon source.
2. Challenge poster – use as a visual reference for the challenge section.
3. Workout video – use in the hero and/or training gallery.

Organize assets inside:

public/
assets/
logo/
videos/
images/
gallery/

Use actual supplied media rather than replacing it with generic stock images.

If the logo has a black background, prepare an appropriate transparent or clean version for use on the dark website without changing the original brand identity.

Use additional royalty-free calisthenics images only where the supplied media is insufficient. Do not present stock athletes as actual ATG members.

# 17. ADDITIONAL UX FEATURES

Implement:

- Sticky navigation.
- Smooth scroll transitions.
- Animated section entrances.
- Interactive skill gallery.
- Video lightbox.
- Floating WhatsApp CTA, activated only after the real number is configured.
- Functional enquiry form with a configurable submission destination.
- Instagram link integration.

- Scroll-to-top button.
- Mobile-friendly navigation.

Keep animations subtle and performance-friendly.

# 18. IMPORTANT CONTENT RULES

Do not invent:

- Membership prices.
- Class timings.
- Trainer qualifications.
- Student testimonials.
- Years of experience.
- Awards and achievements.
- Phone numbers.
- Email addresses.
- Number of members.

Where business information is missing, create editable configuration fields or mark the information as awaiting confirmation.

# 19. FINAL EXPECTATION

Do not just generate a basic landing page.

Build a complete, polished and visually impressive website with the quality of a premium international sports and calisthenics brand.

The website should immediately communicate that ATG CaliFit is about:

STRENGTH.
SKILLS.
COMMUNITY.

The first screen should be visually striking. Training programs should be easy to understand. The skill showcase should inspire visitors. The contact section should make it easy to enquire and join.

Before finishing:

1. Run the project.
2. Check all pages and sections.
3. Test mobile and desktop responsiveness.
4. Test navigation and all CTAs.

5. Verify the enquiry form.
6. Fix console errors.
7. Optimize image and video loading.
8. Ensure the website is ready for deployment.

Start by inspecting the existing project structure. If no existing project exists, initialize a new Next.js project. Then implement the complete website, not just a wireframe or mockup.
